TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
Frontend	React.js (Hooks, Context API), Next.js, TanStack Query, Tailwind CSS
Backend & APIs	Node.js, Express.js, RESTful APIs, third-party integrations (OAuth, object storage)
Database & Auth	PostgreSQL, Supabase, Prisma, row-level data access controls
Hosting & Tools	Vercel, Git, GitHub, Docker

EXPERIENCE

Syntactics Inc.

Cagayan de Oro City, Philippines

Full-Stack Developer Intern

June 2025 – Aug 2025

- Built and maintained **React + TypeScript** web app features for client platforms (**Next.js**, **Laravel**), translating **Figma** designs into responsive **Tailwind CSS** UIs and shipping through **senior-reviewed PRs** with QA sign-off before each production deploy.
- Developed **REST API** endpoints, multi-filter data tables, and **Cloudflare R2** file-upload integrations for an employee training platform—troubleshooting issues and delivering production-ready full-stack work against client requirements.
- Refactored **React** architecture for a multi-specialty EMR system, consolidating initialization logic from **20+ pages** into a shared hook—improving maintainability across **25+** active deployments and reducing duplicated setup code.

PROJECTS

Chirper — Full-Stack Social Media Platform

[GitHub](#) | [Live](#)

React · TypeScript · Express.js · Node.js · PostgreSQL · Supabase · Vercel

- Built a full-stack web app with **React**, **TypeScript**, and an **Express.js** backend (**40+** REST endpoints) in a **pnpm monorepo**—deploying the frontend on **Vercel** and containerizing the API with **Docker**.
- Integrated **Supabase** object storage for avatars and post images via **multer**, with cleanup on update; wired **Google OAuth** (Passport.js) and JWT cookie auth alongside email/password login.
- Implemented real-time messaging and notifications with **Socket.IO**, using **React 19** `useOptimistic` for instant UI feedback and connection state recovery on reconnect.

Calibrate AI — Job Application Tracker

[GitHub](#) | [Live](#)

React · Next.js · TypeScript · PostgreSQL · Prisma · Vercel

- Developed a full-stack app on **Next.js** and **TypeScript** with **PostgreSQL (Prisma)**, deployed on **Vercel**—CRUD for applications, analytics dashboards, and **Google OAuth** via Better Auth.
- Enforced per-user data isolation with row-level **Prisma** ownership guards on every query and **Upstash Redis** rate limiting (**8 req/hr**)—mirroring **RLS**-style access control and preventing cross-user data exposure.
- Connected third-party APIs (**Vercel AI SDK**, structured JSON via **Zod**) and separated reads (**React Query** API routes) from writes (**Server Actions**) for cache invalidation and optimistic UI updates.

EDUCATION

University of Science and Technology of Southern Philippines

Cagayan de Oro City

Bachelor of Science in Computer Science

Expected June 2026

- Dean's List—Awarded for academic excellence across **4** semesters.

INDEPENDENT STUDY

The Odin Project

Oct 2023 – March 2026

Full-Stack JavaScript — Open-Source Curriculum

- Completed **30+** projects from static sites to deployed web apps (**1,000+** hours), building **React**, **TypeScript**, **Node.js**, and **PostgreSQL** skills by reading docs and shipping iteratively.
