SUMMARY

Full-stack JavaScript developer and BS Computer Science candidate (June 2026) with a production internship at a B2B software development firm and **30+** projects built across **1,000+** hours of self-directed full-stack study in The Odin Project. Core stack: React, Next.js, TypeScript, Node.js, Express, and PostgreSQL.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, PHP, SQL, HTML5, CSS3
Frontend	React, Next.js, Zustand, TanStack Query, shadcn/ui, Tailwind CSS
Backend	Node.js, Express.js, Laravel, Prisma, Socket.IO, JWT, Zod, RESTful APIs
Databases	PostgreSQL, MySQL, Supabase, Upstash Redis
Tools & Platforms	Git, Docker, Jest, Vercel, DigitalOcean, Cloudflare R2

EXPERIENCE

Syntactics Inc.

Cagayan de Oro City, Philippines

Full-Stack Developer Intern

June 2025 – Aug 2025

- Refactored a multi-specialty EMR platform (Laravel + Next.js) serving **25+** client deployments by consolidating initialization logic from **20+** modules into a single shared hook—eliminating **~95%** of duplicated code and streamlining cross-client updates.
- Translated Figma designs into responsive **React** + Tailwind CSS pages for an employee training platform (Next.js), extracting reusable component patterns that standardized UI across the project and accelerated subsequent page development.
- Engineered Laravel REST API endpoints with multi-filter sortable data tables and **Cloudflare R2** file-upload integration, offloading binary assets from the primary database and reducing production storage growth.

PROJECTS

Calibrate AI — AI-Powered Job Application Tracker

Mar 2026 – May 2026

Next.js · TypeScript · PostgreSQL · Prisma · Vercel AI SDK · Mistral AI · Upstash Redis

[GitHub](#) | [Live](#)

- Architected a full-stack job tracker on **Next.js 16** App Router with Server Actions and React Server Components; ships an analytics dashboard with status charts, sortable TanStack Table, and client-side global search, scoring **95** on Lighthouse performance.
- Engineered AI resume-analysis pipeline (Vercel AI SDK + Mistral) with Zod-enforced structured output; produces **0–100** fit score, **8–12** matching skills, **5–8** gap identifiers, and actionable recommendations per analysis.
- Implemented Upstash Redis sliding-window rate limiting (**8 req/hr/user**) and row-level Prisma ownership guards; eliminates cross-account data leakage and caps LLM spend in production.

Chirper — Social Media Platform

Oct 2025 – Mar 2026

React · Next.js · Express.js · TypeScript · PostgreSQL · Prisma · Supabase · Socket.IO

[GitHub](#) | [Live](#)

- Shipped a real-time social media platform (DMs, notifications, infinite-scroll feeds) as a pnpm monorepo: Next.js 16 frontend, layered Express 5 REST API (**40+** endpoints, **10** domains), and shared TypeScript packages—**Dockerized** and deployed to DigitalOcean.
- Integrated **Socket.IO** real-time DMs and push notifications with JWT `httpOnly` auth and connection-state recovery; paired with **React 19** `useOptimistic` for instant perceived write responses.
- Modeled **9**-table social graph in Prisma with self-referential threaded replies, many-to-many chat rooms, and cursor-based pagination, eliminating offset degradation on high-volume feed queries.

EDUCATION

University of Science and Technology of Southern Philippines

Cagayan de Oro City

Bachelor of Science in Computer Science

Expected June 2026

- Dean's List—Awarded for academic excellence across **4** semesters.
- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Networks & Communications, Information Assurance & Security, Software Engineering, Operating Systems
