EDUCATION

University of Science and Technology of Southern Philippines

Bachelor of Science in Computer Science, Cum Laude

Cagayan de Oro City

Jun 2026

- Best Thesis Award
- Dean's List (4 semesters)

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, PHP, Python, SQL, HTML5, CSS3
Frontend	React, Next.js, Zustand, TanStack Query, TanStack Table, Tailwind CSS, shadcn/ui
Backend	Node.js, Express.js, NestJS, Laravel, Prisma, Passport.js, Better Auth, Socket.IO, JWT, Zod, REST APIs
Databases	PostgreSQL, MongoDB, Mongoose, MySQL, Supabase, Upstash Redis
Tools	Git, GitHub, Docker, Jest, Vercel, DigitalOcean, Cloudflare R2

EXPERIENCE

Syntactics Inc.

Full-Stack Developer Intern

Cagayan de Oro City

Jun 2025 – Aug 2025

- Refactored a multi-specialty EMR platform (CodeIgniter + React.js) across 25+ client deployments, consolidating initialization logic from 20+ modules into a single shared hook and eliminating ~95% of duplicated code.
- Translated Figma designs into responsive React + Tailwind CSS pages for an employee training platform, extracting reusable component patterns that standardized UI and accelerated later page development.
- Built Laravel REST API endpoints for the same employee training platform, adding multi-filter sortable data tables and Cloudflare R2 file uploads to offload binary assets and reduce production storage growth.

PROJECTS

DevLog — Developer Productivity Tracker

Jul 2026 – Present

NestJS · React · MongoDB · Mongoose · JWT · pnpm monorepo

- Built a NestJS backend with six resource modules (sessions, DSA practice, projects, snippets, articles, auth), each with ownership-scoped authorization enforced at the service layer.
- Implemented JWT authentication with httpOnly cookies, Passport local and JWT strategies, and a global guard with a `@Public()` decorator escape hatch.
- Designed MongoDB aggregation pipelines for real-time statistics across sessions and projects, including streak tracking and time-logged calculations.

Calibrate AI — AI-Powered Job Application Tracker

Mar 2026 – Jun 2026

Next.js · React · TypeScript · Tailwind CSS · PostgreSQL · Prisma · Better Auth · Vercel AI SDK · Redis

[GitHub](#) | [Live](#)

- Built a production-ready AI-powered job application tracker featuring resume analysis, enhancement suggestions, version history, and analytics dashboards.
- Developed a schema-constrained evaluation pipeline using Vercel AI SDK, Mistral AI, and Zod to generate deterministic resume-fit assessments.
- Optimized performance with Prisma PostgreSQL driver adapters and Redis-backed sliding-window rate limiting.

Chirper — Social Media Platform

Oct 2025 – Mar 2026

Next.js · React · Tailwind CSS · Express.js · PostgreSQL · Prisma · Socket.IO · Docker

[GitHub](#) | [Live](#)

- Developed a full-stack social platform supporting posts, follows, messaging, notifications, bookmarks, and user profiles.
- Implemented real-time messaging and notifications with Socket.IO using JWT authentication and optimistic UI updates.
- Designed a layered Controller–Service–Repository architecture spanning 40+ REST API endpoints.

Find It — Full-Stack Photo Tagging Game

May 2025 – Jun 2025

React · Tailwind CSS · Express.js · PostgreSQL · Prisma · Jest · Supertest

[GitHub](#) | [Live](#)

- Built a full-stack “Where’s Waldo”-style game with timed gameplay, click-coordinate validation, and per-scene leaderboards.
- Implemented coordinate normalization to validate image clicks accurately across different screen sizes and viewpoints.
- Wrote integration tests for gameplay validation endpoints using Jest and Supertest.
