TECHNICAL SKILLS

Languages	TypeScript, JavaScript, PHP, SQL, HTML5, CSS3
Frontend	React, Next.js, TanStack Query, Tailwind CSS
Backend	Node.js, Express.js, Laravel, Prisma, Socket.IO, RESTful APIs
Databases	PostgreSQL, MySQL, Supabase, Upstash Redis
Tools & Platforms	Git, Docker, Vercel, DigitalOcean, Cloudflare R2

EXPERIENCE

Syntactics Inc.

Full-Stack Developer Intern

Cagayan de Oro City, Philippines

June 2025 – Aug 2025

- Maintained and enhanced a multi-specialty **EMR** web platform (**Laravel + Next.js**) serving **25+** client deployments, consolidating scattered initialization logic from **20+** modules into a shared hook—eliminating **~95%** of duplicated code and streamlining future **website updates** across all clients.
- Delivered production-ready UI for an employee training platform by translating **Figma** designs into responsive **React** and **Tailwind CSS** screens (**Next.js**), shipping each change through **senior-reviewed PRs** with **QA** sign-off before deployment.
- Built **Laravel REST API** endpoints, multi-filter sortable data tables, and **Cloudflare R2** file-upload integration for the training platform, offloading binary assets from the primary database and shipping all features to production.

PROJECTS

Calibrate AI — AI-Powered Job Application Tracker

Next.js · TypeScript · PostgreSQL · Prisma · Vercel AI SDK · Mistral AI · Upstash Redis

Apr 2026

[GitHub](#) | [Live](#)

- Developed a full-stack job tracker with **Next.js 16** App Router, **Server Actions**, and **React Server Components**; delivers analytics dashboard with status charts, sortable **TanStack Table**, and client-side global search, scoring **95** on Lighthouse performance.
- Engineered AI resume-analysis pipeline (**Vercel AI SDK + Mistral**) with **Zod**-enforced structured output; produces **0–100** fit score, **8–12** matching skills, **5–8** gap identifiers, and actionable recommendations per analysis.
- Implemented **Upstash Redis** sliding-window rate limiting (**8 req/hr/user**) and row-level **Prisma** ownership guards; eliminates cross-account data leakage and caps LLM spend in production.

Chirper — Twitter/X Clone

React · Next.js · Express.js · TypeScript · PostgreSQL · Prisma · Supabase · Socket.IO

Oct 2025 – Mar 2026

[GitHub](#) | [Live](#)

- Built a full-featured Twitter/X clone with real-time messaging, notifications, and infinite-scroll feeds by architecting a **pnpm** monorepo with **Next.js 16**, a layered **Express 5** REST API (**40+** endpoints, **10** domains), and shared **TypeScript** packages; **Dockerized** and deployed to **DigitalOcean**.
- Integrated **Socket.IO** real-time DMs and push notifications with JWT `httpOnly` auth and connection-state recovery; paired with **React 19** `useOptimistic` for instant perceived write responses.
- Modeled **9**-table social graph in **Prisma** with self-referential threaded replies, many-to-many chat rooms, and cursor-based pagination, eliminating offset degradation on high-volume feed queries.

EDUCATION

University of Science and Technology of Southern Philippines

Bachelor of Science in Computer Science

Cagayan de Oro City

Expected June 2026

- Dean's List—Awarded for academic excellence across **4** semesters.

INDEPENDENT STUDY

The Odin Project

Full-Stack JavaScript — Open-Source Curriculum

Oct 2023 – March 2026

- Completed The Odin Project full-stack curriculum (**30+** projects, **1,000+** hours) from sophomore through senior year, shipping production apps in **React**, **Node.js**, and **PostgreSQL** that led directly to Chirper and Calibrate AI.
